

## Care & Cleaning

### Maintenance of Fireclay Sinks

Fireclay sinks are designed and produced for a lifetime of use with minimal care. For everyday cleaning of common dirt and stains, use soapy water or a mild dish detergent. Rinse thoroughly and wipe dry. For harder stains, use a 50/50 mix of water and bleach solution or a non-abrasive cleaner according to the manufacturer's instructions. Rinse thoroughly and wipe dry.

- DO NOT use any harsh abrasive or caustic cleaners containing ammonia or alkalis.
- DO NOT use any strong chemicals or undiluted bleach solution.
- DO NOT use steel wool or scouring pads, as they might damage the sink surface.
- DO NOT place hot pots or pans directly onto sink.
- DO NOT pour boiling water directly onto sink – always run cold water in sink when pouring boiling water.
