Type 304 Premium Stainless Steel

Hamat USA sinkware is made from durable Type 304 stainless steel, an optimal mix of nickel and chromium, making our sinkware exceptionally resistant to corrosion and stains for the life of the product. It provides a hygienic, scratch-resistant and resilient surface that requires minimal care and maintenance.

SpexEdge

A beveled edge on the outer rim of select undermount sinks provides increased structural rigidity for the entire sink span and creates a smooth and finished look. SpexEdge is found only on **Hamat** USA sinks.

StoneShield Undercoat Protection

A marble powder based undercoating specially formulated and applied over pads. It reduces the noise of clattering dishes and running water. It also prevents condensation and thermally insulates your sink keeping hot soaking water hot for a longer period.

Sound Deadening Pads

Made of natural rubber, Sound Deadening Pads help reduce the noise of clattering dishes and running water. It is a common feature to all **Hamat** USA sinks.

TotalGuard+

An exclusive feature to our Rendezvous, Contrive, Hudson, Axiom and Prizm Collections. This complete wrapping of rubber pad insulation ensures thermal insulation, prevents condensation, and optimal noise reduction making them some of the quietest sinks available today.

Cuverro Shield™

White Copper—a new solid antimicrobial finish. This new PVD finish continuously kills 99.9% harmful bacteria such as MRSA Staphylococcus, E Coli, and VRE within 2 hours.

Limited Lifetime Warranty

Almost all **Hamat** USA sinks are covered by an industry-leading Limited Lifetime Warranty to the original purchaser against any possible defects in materials and workmanship. Our Enterprise Collection is covered with a 10-year limited warranty. We are not satisfied unless our customers are completely satisfied with our products.

SINK SELECTION GUIDE

HOW TO SELECT THE IDEAL SINK FOR YOUR NEEDS:

YOUR KITCHEN STYLE

Start by asking yourself whether your kitchen is traditional, transitional, rustic, or contemporary. Then determine the shape, size and features that will best suit your style of living and everyday needs. **Hamat** USA sink designs vary with each product family, so you're sure to find one that's just right for your kitchen, lavatory, or prep area.

MATERIAL

Hamat USA sinks are available in Stainless Steel, Chelsea Fireclay, and SiOStone Granite Composite. Each material has its own performance features and distinct look.

CHECK YOUR MEASUREMENTS

Choose the right sink to fit your cabinet. Sink measurements and minimum cabinet sizing are shown with each sink in this catalog.

INSTALLATION STYLES

Undermount sinks are best for stone or solid surface countertops. They are mounted from the underside of the counter, leaving a zero-barrier counter surface to sweep scraps and crumbs into the sink. Topmount sinks are best if your countertop is a laminate with a pressed wood core or with solid surface countertops. With topmounts, the sink's bowl drops into a hole in the countertop and rests on the perimeter.

NUMBER OF BOWLS

How will you be using your sink? A serious home chef may want several deep bowls to accommodate stockpots and roasting pans. If you'll be using your sink primarily for rinsing dishes, a single bowl of moderate depth will suffice. When in doubt, a large and deep single bowl is the best choice.

DEPTH OF BOWLS

Deeper bowls in the 9" range will accommodate large pots and allow you to thaw larger food items. Deeper bowls also mean less splashing. Shallow bowls down to 5" are ideal for food preparation and will also accommodate a garbage disposer.

PREP SINK

A well-placed prep sink in a busy kitchen can noticeably improve flow and efficiency and can also double as a bar-sink in other areas of the house. Prep sinks of various depths and shapes can be found built in on many **Hamat** USA models or purchased separately for other locations like a countertop island.

FIRECLAY SINKS

Sink Model # CHE-3320SA-WH

Your kitchen sink is one of the most-used surfaces in your home—it should be made from the safest materials. Hamat's Fireclay Kitchen Sinks are crafted from four natural minerals—kaolin, quartz, feldspar, and clay—creating a clean, non-toxic surface that promotes a healthier kitchen environment. Fired at 2200°F for exceptional durability, our fireclay sinks feature a non-porous, ultra-smooth surface that resists bacteria, stains, and odors. Unlike metal or synthetic alternatives, Fireclay is naturally hygienic, easy to clean, and built to last—offering peace of mind for health-conscious homeowners.

STAINLESS STEEL SINKS

Sink Model # REN-3218S

Discover the World of Stainless Steel with Hamat USA

At **Hamat** USA, we proudly offer one of the most extensive collections of stainless steel sinks available in the US, carefully curated with over 20 unique product suites. Whether you're working on a budget-friendly residential renovation, a large-scale commercial project, or a custom-designed kitchen, we've developed products to meet the needs of every project and price range.

Our premium stainless steel sinks are meticulously hand-folded and welded, unlike the stamped sinks commonly found today. Among our diverse collection, you'll find 16-gauge undermount workstation sinks, 18-gauge undermount options, apron front sinks, and undermount sinks with sleek 10mm radius corners, as well as zero-radius undermount and top-mount sinks. For superior sound performance, each sink is equipped with large sound-deadening pads and undercoating, then wrapped in additional padding for even quieter operation.

We also offer an extensive range of stainless steel sinks in nearly every size and configuration, each featuring full undercoating and generous sound-deadening pads. For those seeking something unique, we carry hard-to-find options like corner sinks, triple-bowl models, and ADA-compliant designs for several collections.

If you're looking for a stainless-steel sink that isn't included in our catalog, please don't hesitate to reach out. We're happy to discuss your project needs.
